CANADA

World's third largest country in area (3,851,113 sq. mi.; pop. 17,500,000; cap. Ottawa). CANADA is an independent dominion, or member, of the British Commonwealth. Its nominal ruler is the British Queen; its actual ruling body is an elected Parliament. Blessed with every natural resource, Canada is rapidly becoming one of the world's most important nations. Half the Canadians are of English descent; one-fourth (mostly living in Quebec Province) of French descent; hence the two official languages. The U. S. and Canada are model good neighbors. Each is the other's best customer for exports; and between them lies a 3,000 mile boundary line unfortified for more than 100 years.
