MICROPRINTING

THIS IS A FORM OF PRINTING (USUALLY DONE BY OFFSET LITHOGRAPHY OR LINE ENGRAVING) MADE UP OF TINY LETTERS AND NUMERALS. THIS TINY PRINTING MAY EITHER BE TREATED AS TEXT OR MAY BE USED TO FORM LARGER PATTERNS OR DESIGN ELEMENTS.

MOST FORMS OF MICROPRINTING, BUT NOT ALL, ARE NEARLY INVISIBLE TO THE NAKED EYE, OFTEN APPEARING AS NOTHING MORE THAN A BROKEN LINE IN THE DESIGN.

ALTHOUGH THERE ARE MANY APPLICATIONS FOR MICROPRINTING, IT IS MOST COMMONLY USED AS A SECURITY DEVICE FOR PRINTING DIFFERENT TYPES OF STAMPS, BANKNOTES AND OTHER SECURITIES.

THE UNITED STATES BEGAN USING MICROPRINTING IN 1992, BOTH AS A SECURITY DEVICE AND AS A DESIGN ELEMENT.

CANADA HAS USED MICROPRINTING FOR YEARS TO IDENTIFY THE YEAR DATES OF VARIOUS STAMPS. OTHER COUNTRIES HAVE BEGUN USING IT AS THE TECHNOLOGY HAS BECOME AVAILABLE.
